Norton NT Tools - Version 1.0

Proven Tools for a Powerful OS - WINDOWS NT

Enhance Your NT Investment Today with Norton NT Tools

Norton Tools is an essential set of proven tools to both enhance your operating system and optimize your time.

You've chosen a powerful operating system—Windows NT. Now Norton NT Tools ™ software gives you a set of proven tools to enhance your investment. Automatically scan and eliminate viruses; quickly manage files on both local and network resources; and easily monitor and view key system information. At last you have an essential set of proven tools to both enhance your operating system and optimize your time.

Protect Your System from Viruses

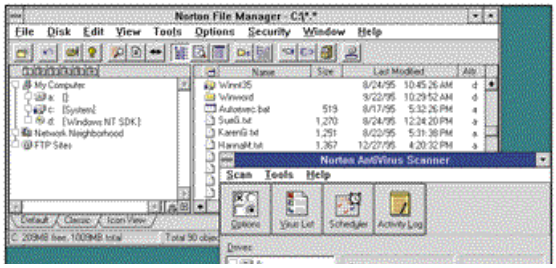
Norton NT Tools helps keep your system virus-free by auto-matically scanning your files to detect and eliminate damaging viruses. Plus, automatic virus update notification and small virus definition files help keep virus definitions cur-rent. Get free virus updates instantly and easily through various Symantec online services.

Take Control of Your Files with Norton File Manager

Now you can browse and configure both mapped and unmapped network resources from one central location. After using the Norton File Manager to connect to any FTP site, you can download files by simply dragging and dropping them between the FTP site and your system. What's more, you can compress files and folders, create self-extracting archives, and compare and synchronize files and folders—all from within the Norton File Manager.

Anticipate and Correct Potential System Problems

System Doctor and System Information provide continuous system monitoring and detailed information on your NT system. With easy-to-set thresholds for system resource management, System Doctor also notifies you when your system is reaching critical levels. And the intuitive display makes viewing information, including the status of another NT system on the network, quick and easy.

Go With the Proven Leader


Norton's award-winning technology and unrivaled ease-of-use have made Norton AntiVirus, Norton Navigator, and Norton Utilities the most widely-used utilities in the world. Now these proven technologies, intuitive interface designs, and powerful features are available to NT users. Together they demonstrate our leadership in providing top quality products and our commitment to the NT platform.
